

*CEMTEC offers mills in various versions, ranging from AG mills to dry grinding of limestone ...*

# First come, first ground.

*No matter whether the project is a grinding plant in the depths of the Amazonian rain forest or a silica drying plant in the rice fields of Thailand – for CEMTEC Cement and Mining Technology GmbH no distance is too big. With their special know-how for plants of the cement, mining, stone and soil industry the Austrians have achieved a marvellous reputation throughout the whole world.*

CEMTEC is specializing in tailor made solutions for the cement and processing industry.

The company plans, develops and realizes projects for its customers worldwide. "No matter whether the project is the erection of a new cement plant in the north of Germany or the revamping of a rotary kiln for cement in the

desert of Dubai, we support our clients with all our power to solve their problems, 24 hours a day!", assures the Sales Manager, Fritz Hofmann.

In these cases, CEMTEC falls back on its long international experience with a great variety of partners and tasks.

The company's scope ranges from rod mills for grinding various materials and mineral bulk materials to rotary drums for the thermic and mechanical treatment of various bulk materials.

Moreover, CEMTEC carries out the complete erection surveillance, starting up and technical advice on site.

CEMTEC was founded in 1990 with the aim to satisfy customers. What sounds that natural requires in this field of business, in which the Austrians act, a large volume of effort.

*... to cement mills of a kind which is used, for example, in the Lübeck Cement Plant for grinding Portland cement.*

Because the customers of the cement, stone and soil industry do not only presuppose professional engineering but also a high degree of flexibility and quick reactions. "That's why we have designed our company structure in a way that allows a speedy and uncomplicated response to clients' individual requirements.", explains Hofmann.

Together with the Spanish Branch Office CEMTEC has conquered with this company philosophy an

outstanding position in the world market.

With 20 employees the Austrian "Grinding Specialists" achieve an annual turnover of 12 million EUR, of which more than 80 % are generated abroad. Increasing tendency.
