

3rd Asian Mining Congress

22 - 25 January, 2010
Netaji Indore Stadium, Kolkata

Commercial Feature

Hari Machines: A diversified heavy engineering and manufacturing enterprise

A Hari Machines is a diversified heavy engineering and manufacturing enterprise serving the cement, mining, power, steel and metallurgical industries. It had a very good booking position prior to the recession and therefore even though there was some slowdown in the cement and steel sector but its diversified portfolio and strong order position kept it out of trouble. Hari Machines also has grown at a steady rate in the past and

engineering & manufacturing organization from a small workshop in

It is a strategic objective in part of Hari Machines to have a diversified & varied range of machinery which has been the one of its key reason for success

the early 2000. This was possible through successful diversification into various sectors and acquiring good technical-know-how from global leaders. It has an exclusive manufacturing tie-up with Allmineral Asia for manufacturing

ficiation equipment. It has also tie-up with Hazemag & EPR

GmbH, Germany for marketing & manufacturing of their complete range of Feeder Breakers. It has also diversified into manufacturing of Boilers for Power & Process Plants. Recently, it also tied-up with Cemtec GmbH, Austria for

their complete range of Ball Mill, Rod Mill, Scrubbers, Dryers, Mixers, Pelletizing Disc etc. Hari Machines can now provide complete crushing & grinding solutions to various sectors like Coal, Iron Ore, Limestone & other minerals etc.

Hari Machines has a good infrastructure for heavy engineering & manufacturing. Over the years, it has successfully manufactured & supplied several critical equipments with designs from world leaders like SMS Siemag,

The manufacturing sector will also witness huge growth to meet the demands of the core sectors like Power, Steel & Cement. Hari Machines is fully geared up to meet the growing demand in future. Further, it is in continuous look out for long term manufacturing tie-ups with global leaders to enhance its technical & manufacturing expertise. It is a strategic objective in part of Hari Machines to have a diversified & varied range of machinery which has been the one of its key reason for
